

Mobile collection and exchange tool for supply chain transactions

FarmerLink facilitates...

- ✓ ...the registration of farmers, producers groups, plots, products, production and sales
- ✓ ...the communication on purchase price between buyers and farmers
- ✓ ...the producers, producer groups and buyers to monitor the registration of product deliveries and advances and transactions direct and real time
- ✓ ... the POs and others like field agents to have an overview on the basic administration of producers, historical data and potential production
- ✓ ... importing and exporting data to other software applications

FarmerLink options:

- ✓ The app has the basic functions on registration and reporting; customisation on capture of other relevant data and reporting is an option
- ✓ Development of options, such registering of stocks, packaging, product quality for POs
- ✓ Plantations, photos, trainings, inputs, other products, GPS position for producers
- ✓ Projections and planning of production and cash
